Maslow's hierarchy of needs is a motivational theory in psychology comprising a five-tier model of human needs, often depicted as hierarchical levels within a pyramid. Provide **TWO (2)** points to explain each level labeled as I, II, III, IV, V in the pyramid above and provide **ONE (1)** example to strengthen each of your explanation.

**PART B (I)****(10 MARKS)****INSTRUCTIONS:**

Read each statement carefully. Choose TRUE if you think the statement is true. Choose FALSE if you think the statement is false.

No	Statement	Answer
1	Joining a group is a matter of establishing bonds of attraction to the group, its goals and its members.	True / False
2	The difference threshold is the point where something becomes noticeable to our senses.	True / False
3	Goal setting is a powerful process for thinking about your ideal future, and for motivating yourself to turn your vision of this future into reality.	True / False
4	Children's feelings of competence about their appearance, athletic ability, and likeability is more affected by parents than by peers.	True / False
5	Priming is activating particular associations in one's memory.	True / False
6	Self-esteem is a conceptual system made up of one's thoughts and attitudes about one's self.	True / False
7	The negative identity is the opposite of what the parents or society expect.	True / False
8	Attractive individuals are more likely to report high self-esteem than those who are less attractive.	True / False
9	In addition to task-specific roles, there are also general roles that describe each member's place in the life of the group.	True / False
10	Motivation is one of the most talked about subjects in psychology. Some researchers have suggested that motivation is a single, general ability, while others believe that it encompasses a range of aptitudes, skills, and talents.	True / False
